

## – Simplifying Analysis for Everyone

*QPR FactView is a complete software solution for business analysis. It is quick-to-deploy, easy-to-learn, and easy-to-use. QPR FactView is based on single architecture to cover all types of analysis and reporting needs for all organizations.*

*QPR FactView's patented technology never restricts the end user in the pursuit of knowledge hidden in operational system data. QPR FactView easily scales to meet the needs of any organization.*

*QPR FactView is revolutionary and introduces new rules in business analysis.*

The last 10 years have seen organizations make significant investments in automating business processes. Now their attention has turned to improving the performance of these processes. The challenge is that information needed to drive improvements in these processes is trapped in the underlying operational systems. The QPR FactView business analysis suite allows organizations to measure, monitor and track the performance of key processes. QPR FactView's click driven, visually interactive interface gives users instant access to top level metrics and record level detail, revealing unanticipated insights hidden in operational systems.

QPR FactView simplifies analysis for everyone. The patented technology allows instant, in memory, manipulation of massive datasets on low cost hardware, allowing affordable widespread deployment of sophisticated analytic applications in days. Using QPR FactView organizations can gain business value quickly as they develop, modify, deploy, and – most importantly – use business intelligence applications.

QPR FactView is changing the game in business analysis, the new rules in business analysis are:

- Fast time to value – customers are live in less than 30 days, and most in a week.
- Risk free – available as a fully-functional free trial download.
- Easy to use – end users require no training.
- Flexible – unlimited dimensions and measures that can be modified in seconds.
- Integrated – fully integrated business analysis suite – power analysis, sophisticated applications, and simple reporting on a single architecture.
- Powerful – near instant response time on massive data volumes.

### Enabling user intelligence

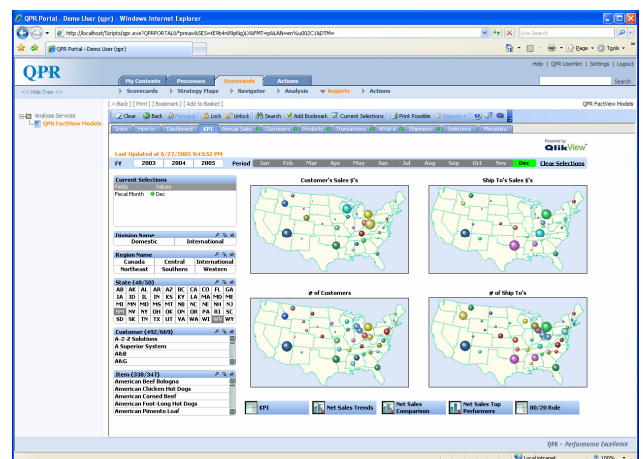

QPR FactView empowers users to make the right decisions at any time and puts knowledge at their fingertips wherever they are. Analysis can be taken entirely off-line on a laptop and remains fully functional. Results can be printed as reports, saved as Adobe PDFs, sent to Microsoft Excel or copied into other Microsoft Office applications. QPR FactView works the way users work.

### Quick-to-deploy, easy-to-learn, easy-to-use

QPR FactView requires little to no end user training. End users are able to use QPR FactView models in minutes, resulting in fast deployment and reduced costs. Once familiar with the benefits of QPR FactView users find it hard work without them.

### Single architecture for analysis, applications, and reporting

QPR FactView provides a single architecture to meet all your data analysis needs. By carefully controlling user rights, organizations can deploy ad-hoc analysis to power users, printable reports to remote users, dashboard metrics to executives, and analytic applications to middle managers. This unified architecture provides all users a single version of the truth – from key performance indicators to the underlying detailed data.

### QPR FactView always provides an answer

QPR FactView never restricts users. Every object in QPR FactView – from lists, to graphs, to tables – is clickable. All objects interact so that a selection in one affects the others. Query results are revealed instantly through intuitive color coding; selected values are highlighted green, linked values are highlighted white, and excluded values are highlighted gray. With each click the user learns exactly what data is available, what data is excluded, and how selections affect summary metrics. QPR FactView gives users the power to find their own path to insight.

### Integrates all data for analysis

QPR FactView handles the integration of virtually all existing data formats – from standard relational data, to text exports, to Microsoft Excel data, to XML streams. Data is loaded, cleansed, and stored using a wizard driven ETL script. QPR FactView adapts to the company's existing environment not the other way around. Whether data is stored in data warehouses or operational systems, it is always available for use in QPR FactView applications.

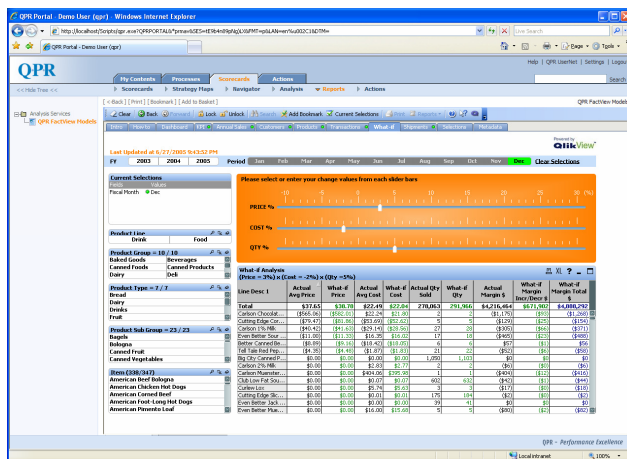

## Fast ROI and lower costs

Thousands of our customers have deployed QPR FactView applications in a matter of days. With QPR FactView a fully functional prototype application can be available in a matter of hours. On-going adjustments to the applications have been simplified in QPR FactView. QPR FactView supports an unlimited number of dimensions and measures, and they can be added in minutes. QPR FactView implementations are fast and result in a fast ROI.

## QPR FactView Deployment Levels

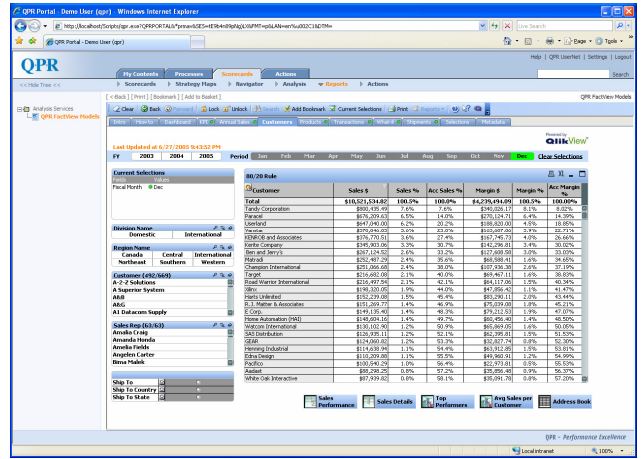

### QPR FactView Enterprise – For the developer

QPR FactView Enterprise is the complete developer's tool for building QPR FactView applications. QPR FactView Enterprise lets developers load disparate data sources for access in a single application. The data load script supports over 150 functions for data cleansing, manipulation and aggregation. Intuitive wizard driven interface allows powerful visually interactive applications to be developed quickly.

### QPR FactView Analyzer – For the end user

QPR FactView Analyzer for Microsoft Internet Explorer lets end-users connect to server based QPR FactView applications.

### QPR - Delivering solutions worldwide

At QPR Software Plc, we have been helping world-class organizations to perform better for more than fifteen years. Our mission is to help people, communities and businesses achieve their goals. As a leading provider of human centric performance and process management solutions, we have enabled over 1000 SMEs, large organizations and multinationals in both the public and private sector to plan, implement, communicate and commit people to strategic ideas.

With QPR solutions you can execute better performing processes, get results fast and find out how QPR is easy to work with. Our applications significantly improve corporate decision-making at each organizational level. QPR 7 seamlessly combines Corporate Performance Management (QPR ScoreCard), Business Process Management (QPR ProcessGuide) and Business Intelligence (QPR FactView) into a comprehensive QPR Collaborative Management Suite (QPR 7).

Based in Helsinki, Finland, and listed on the Helsinki Stock Exchange we are a global company with an extensive network of talented partners in over 50 countries worldwide. Our QPR Community has over 1000 specialists serving satisfied customers on every continent. If you are looking for a solution that can help drive your success to new heights, look no further than QPR – Quality. Processes. Results.

### QPR FactView Designer

**Platform**

- Windows XP Professional
- Windows 2000, Professional SP4

**Memory**

- Depending on size of model 512 MB or higher recommended

**Processor**

- 1 GHz Pentium III (or equivalent)

**Disk space**

- 200 MB total required to install

**QPR FactView Analyzer**

**Processor**

- 1 GHz Pentium III (or equivalent)

**Network Speed**

- 128 kbps minimum. 512 kbps or faster recommended

**Memory**

- Depending on size of model 512 MB or higher recommended

**Browser**

- Microsoft Internet Explorer 6.0 or higher when running QPR FactView Analyzer
