

A fast and easy solution for improving business performance

QPR ScoreCard is a collaborative management software solution for implementing performance management. It is designed to help your business execute better performing processes and implement strategies more effectively. If you want to successfully plan, implement, communicate and commit people to your organization's objectives in a way that is easy and gets results fast, then QPR ScoreCard is the tool for you.

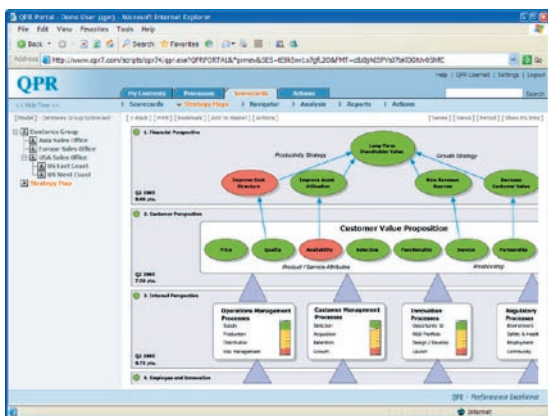

Transform business strategy into action

In today's constantly evolving business environment, your company needs to make sure its employees both understand and commit themselves to shared strategic goals. The Balanced Scorecard (BSC) makes it possible to translate strategy into action by creating specific objectives. It also enables you to monitor the execution of your strategy and create corrective action plans whenever gaps appear between targets and performance.

A comprehensive way of sharing objectives

In order to make your company's vision a reality, you need to make sure it is fully grasped by the people most important to its success: your employees. The QPR ScoreCard is a comprehensive system for performance management that has a low total cost of ownership and is easy to implement.

Simple for anyone to use, its automatic web features cascade specific strategy objectives to every layer of your organization, from the boardroom, through to team level and even down to individuals. By providing clear and easily available performance data, you can make certain all your employees are pulling together in the right direction.

Assign responsibilities to achieve success

Once everyone has a solid grasp of company goals, they need to understand what to do to achieve them. Due to its flexibility, the QPR ScoreCard can support numerous performance measurement frameworks including Balanced Scorecard, Malcolm Baldrige and EFQM. Regardless of the way your company works, QPR ScoreCard can make the strategic big picture easier to grasp by breaking it down into smaller, simpler pieces.

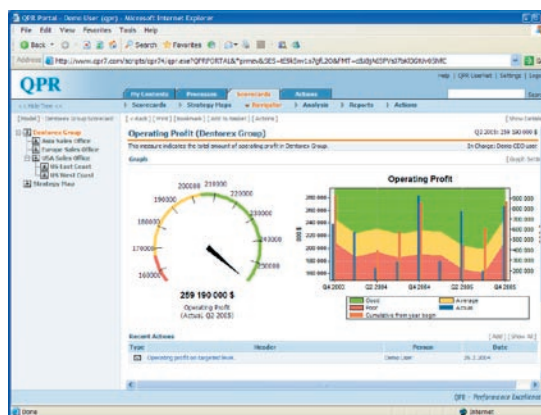

When your employees have a clear understanding of their own specific targets, through features such as strategy maps, they have a clearer picture of how they should act.

By providing these concrete goals, QPR ScoreCard helps your workforce gain a greater sense of ownership in your company's success.

Simplify the complexities of performance

All levels of your organization from senior executives to managers and employees can use the QPR ScoreCard to gain a visual, real-time overview of your organization's performance. Performance measurement data can be retrieved automatically from third party systems such as ERP and CRM, or inputted manually and transformed into easily understood graphs and reports.

With users able to work on content from any location, you can systematically gather comments and analyze on past performance and provide action plans for future improvements. If targets are not being met, you can either drill down into the data or set QPR ScoreCard to trigger automatic alerts.

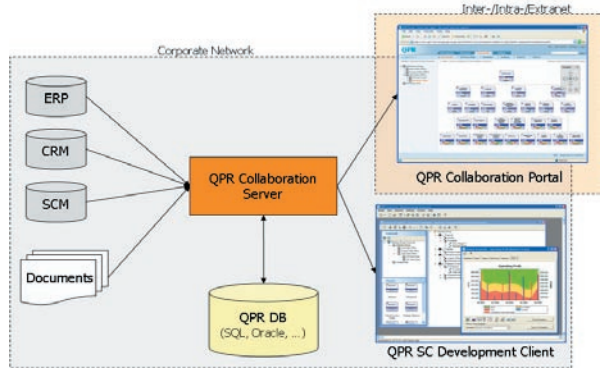

This allows your organization to react fast to performance gaps and business changes. With access to relevant information, you gain more power to make the right decisions and take the right action at the right time.

QPR as part of your IT Infrastructure

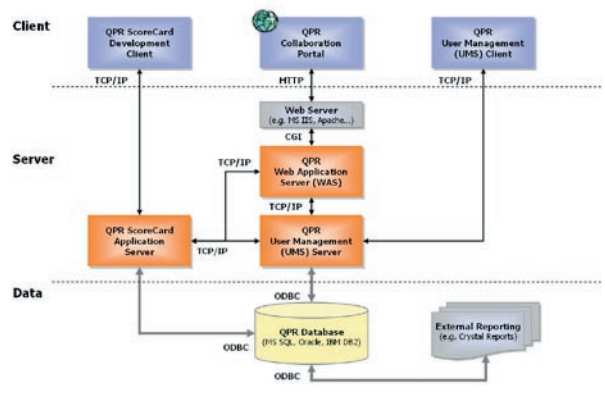

Easy to integrate

QPR helps you enhance your existing information systems by enabling you to build a company-wide performance management system. QPR ScoreCard can be easily implemented on top of a wide variety of databases and IT systems. This system also helps you to save time by automatically updating your organization's performance data whenever required.

QPR delivers results fast

Once you have made the decision to use QPR ScoreCard, it can start working for you as soon as it is implemented. Its user-friendly interface enables you to put scorecards into practice immediately once you have defined them. This means your business can start to evolve as quickly as you can think of ways to enhance it.

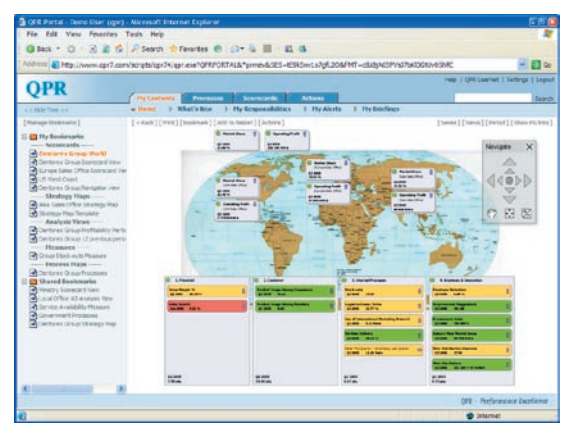

Technology that provides benefits quickly

The QPR Portal enables you to harness the power of your intranet and make material instantly accessible to all who need it. It provides you with a distributed multi-user system with

user authentication, which is scalable from stand-alone to an organization wide solution.

Every person you authorize has access to a wealth of information and can view the entire performance management model, discuss performance and input data through a web browser. The high level of security you need is maintained through use of individual authentication and user rights.

Our multi tier architecture ensures that a globally shared operating environment is not only fast, but reliable too.

QPR - Delivering solutions worldwide

At QPR Software Plc., we have been helping world-class organizations to perform better for more than fifteen years. Our mission is to help people, communities and businesses achieve their goals. As a leading provider of human centric performance and process management solutions, we have enabled over 1000 SMEs, large organizations and multinationals in both the public and private sector to plan, implement, communicate and commit people to strategic ideas.

With QPR solutions you can execute better performing processes, get results fast and find out how QPR is easy to work with. Our applications significantly improve corporate decision-making at each organizational level. QPR 7 seamlessly combines Corporate Performance Management (QPR ScoreCard) and Business Process Management (QPR ProcessGuide) into a comprehensive QPR Collaborative Management Suite (QPR 7).
