

## QPR Collaborative Management Suite for Law Enforcement

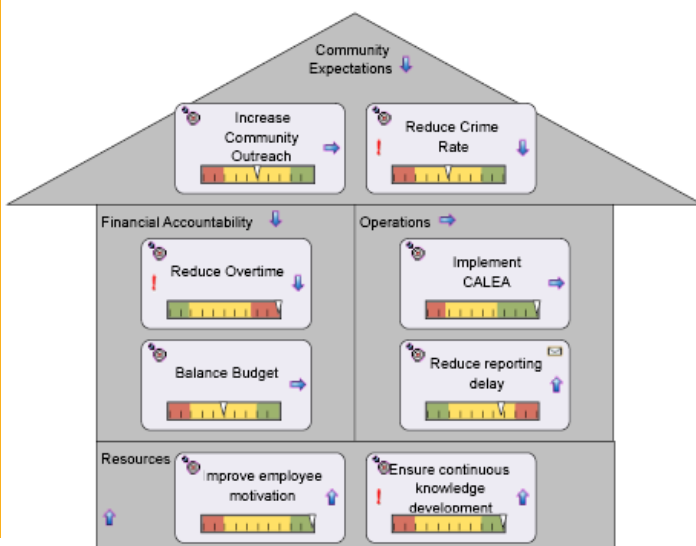

With flexible and reliable QPR Software solutions law enforcement agencies can solve several management challenges, including:

- track strategic objectives and initiatives
- implement consistent COMPSTAT reporting
- meet compliance requirements
- automate city council reporting
- automate operational processes
- track crime statistics.

## Execute Strategy with QPR ScoreCard

“You get what you measure.” Unfortunately it’s not possible to focus on measuring and improving everything at once. That’s why an agency must choose the most important strategic objectives and focus on achieving those through well-defined Initiatives.

***QPR Law allows users to define their Initiatives, link performance goals and track progress against plan. . Because it is web-based, users can access Scorecards via a standard web browser.***

## Build an Intelligence Database

Knowledge is not only in numbers, it’s also in your officers’ heads. QPR Law allows users to add their own comments, action plans, and lessons learned in the system.

That creates an extensive knowledge library, which provides a wealth of information for new employees and helps store valuable knowledge when employees retire or change jobs.

My Actions		[ Show All ]
Modified	Action	
30.05.2007	 New initiative to reduce response time	
21.05.2007	 Risk Assessment for Upcoming Game	
21.05.2007	 Action plan to increase # participants in Crime prog	

## Implement COMPSTAT

A major component in implementing anti-crime strategies is the COMPSTAT Process. This process incorporates the use of computer analysis of crime statistical data, together with accountability of precinct commanders in responding to the situation in their own command.

The pillars of COMPSTAT are:

- Accurate and timely crime information
- Rapid deployment
- Effective tactics
- Follow-up and assessment

***QPR Law Enforcement software makes crime information immediately available along with historical trends and proactive alerting to new crime conditions.***

**Unique to QPR Law is the integration of operational processes into the collection, analysis and distribution of crime data to facilitate proactive and timely follow-up and assessment.**

Hierarchy			
COMPSTAT			
Community Expectations	Q4 / 2006 5,00	●	↓
Reduce Crime Rate	12 / 2006 5,00	●	↓
Increase Community Outreach	Q4 / 2006 5,00	●	↔
Financial Accountability	12 / 2006 2,50	●	↓
Balance Budget	12 / 2006 5,00	●	↔
Reduce Overtime	12 / 2006 17.3 %	●	↓
Operations	Q4 / 2006 5,00	●	↔
Implement CALEA	12 / 2006 10,00	●	↔
Reduce reporting delay	12 / 2006 min 6.17	●	↑
Resources	Q4 / 2006 10,00	●	↑
Improve employee motivation	Q4 / 2006 8	●	↑
Ensure continuous knowledge development	Q4 / 2006 Completed	●	↑

## Automate Reporting

Time consuming, yet critical to any Law Enforcement operation is reporting results against goals and objectives.

Whether it be City Council reporting or simply intra-agency reporting, QPR Law automates the format and content to provide timely, consistent and accurate status against defined metrics. This, in a format defined by the audience via web browser.

My Contents	Processes	Scorecards	Actions
